

Funny Pumpkin Carving Template

Instructions:

Tape this printout to your cleaned out pumpkin where you would like to cut out the image. Poke small holes through the picture into your pumpkin with a thumb tack or nail. Be sure to follow the edge of the black part of the picture. When you finish poking holes into your pumpkin through the picture, an outline of the image will be on your pumpkin. Now remove the paper and carve your pumpkin as you normally would. Be sure to cut out only the black parts.
