

# Horses

## Coloring Page

### Coloring Tips:

The horse on the left is more lightly colored than the horse on the right.

Use a very light brown or tan color on the horse on the left with soft pressure (leave a white patch on the face). The horse on the right is dark brown in color. Add the dark color in blotchy patches (leave a white patch on this horse's face also).

This picture is meant to be in the snow, so the ground may be left white if you wish, or you may add color to create any seasonal look.

The background should be different shades of gray to establish a fence and trees.
